

CNC, SILO RIBS FORMING & BENDING MACHINE w/PLC

Special ribbed rollers

Servo driven rotation movements for fast and accurate bending

- Automatic operation with CNC automation.
- Siemens PLC.
- Siemens 7" touch screen.
- Rotation system powered by servo motor (Siemens).
- Memory.
- Steel construction body.
- 4 Roller bending
- Hardened roll sleeves for each different shape
- Bearing nest for all mandrel roll sleeves.
- SAE 1050 certificated steel shafts.
- Easy operation with mobile control panel with foot pedals.
- Lateral rolls move linear way
- Top roll and bottom roll powered by gearbox and gear rotation system.
- Infinitely variable speed adjustment system.
- Safety wire included.
